

JET

SU1 SUGARY YELLOW

Jet: is a **fast very early** su1 yellow processor, with excellent yield and recovery for its maturity. Highly adaptable. Jet is rapidly becoming the standard for start up programs.

- **Field Performance:** Plant for early and mid season, in particular to start factories earlier. Excellent emergence and vigor under cold conditions. Large harvest window and holds well on a strong plant.
- **Processor Performance;** Freezes as both kernel and cob. Cans well. Good colour and eating quality. Very uniform medium size cylindrical cob with medium kernels. High recovery and yield for this maturity. Very strong tip fill. Runs through plants well.
- **Management Points:** Very consistent high yield under early cool conditions. Highly adaptable to start up seasons. Very quick.
- **Maturity Slot:** Plant first and up to early mid season. Test for late season catch up, only if this earliness is required.

Sugary Yellow (su1)	Plant Characteristics								Disease Resistance								Herbicide Tolerance
